# Ondernemen in de tuinbouw is topsport!

Sport en ondernemen hebben veel raakvlakken. De juiste doelen stellen, focus houden en je niet laten afleiden door onverwachte omstandigheden onderweg, maar waar nodig je plan aanpassen. Beide domeinen vereisen discipline, doorzettingsvermogen en strategisch denken om je doelen te behalen en uitdagingen aan te gaan. Samen de uitdaging aangaan geeft ook saamhorigheidsgevoel. Afgelopen jaar hebben we als AllPlant Team getraind om mee te doen aan de ‘MudMasters’ en het teamgevoel kunnen versterken.

Afgelopen jaar hebben we veel uitdagingen op ons pad gehad. De belangrijkste waren wel de stijgende kosten en veranderende marktomstandigheden. Voor de opkweek van de jonge planten wordt ook bij AllPlant energie verbruikt voor verwarmen van de kas en het belichten van de jonge planten. Hier hebben we de grenzen moeten opzoeken van wat mogelijk is om met zo weinig mogelijk energie de planten te bewortelen zonder concessies te doen aan kwaliteit.

In de nieuwe AllPlant catalogus hebben we wederom veel nieuwe en aanvullende planten aan ons assortiment toegevoegd.

Wij kijken uit naar een plezierige samenwerking.

Simon Gootjes

## EN | Entrepreneurship in horticulture is top sport!

Sports and entrepreneurship have a lot in common. Setting the right goals, keeping focus, and not getting distracted by unexpected circumstances along the way, but adjusting your plans where necessary. Both fields require discipline, perseverance, and strategic thinking to achieve your goals and face challenges. Facing challenges together also gives a sense of solidarity within the team. Last year, the AllPlant team trained together to participate in ‘Mudmasters’ and strengthen the team spirit.

The previous Season we have faced many challenges. The most important were the rising costs and changing market conditions. For the cultivation of our young plants, AllPlant also uses energy for heating the greenhouse and lighting the young plants. We had to push the limits of what is possible to root our plants, using energy, as efficient as possible, without compromising on quality.

In the new AllPlant catalogue we have again listed many new and additional plants to our assortment.

We are looking forward to a pleasant cooperation.

Simon Gootjes

## EN | Unternehmen im Gartenbau ist Spitzensport!

Sport und Unternehmen haben viele Gemeinsamkeiten. Man muss sich die richtigen Ziele setzen, sich konzentrieren und sich nicht von unerwarteten Umständen auf dem Weg dorthin ablenken lassen, sondern seinen Plan, falls notwendig, anpassen. Beide Bereiche erfordern Disziplin, Ausdauer und strategisches Denken, um Ziele zu erreichen und Herausforderungen zu meistern. Die gemeinsame Bewältigung der Herausforderung vermittelt auch ein Gefühl der Zusammengehörigkeit. Letztes Jahr haben wir als AllPlant Team für die Teilnahme an den “MudMasters” trainiert und haben so den Teamgeist verstärkt.

Im vergangenen Jahr standen wir vor vielen Herausforderungen. Die wichtigsten waren jedoch die steigenden Kosten und die veränderten Marktbedingungen. Auch bei der Vermehrung der Jungpflanzen wird bei AllPlant Energie für die Beheizung des Gewächshauses und die Beleuchtung der Jungpflanzen verbraucht. Hier mussten wir an die Grenzen des Möglichen gehen, um die Pflanzen mit so wenig Energie wie möglich zu bewurzeln, ohne dabei Kompromisse bei der Qualität einzugehen.

Im neuen AllPlant-Katalog haben wir wieder viele neue und Ergänzungen zu unserem Assortiment aufgenommen.

Wir freuen uns auf eine angenehme Zusammenarbeit.

Simon Gootjes

# Duurzaamheid

## Sustainability | Nachhaltigkeit

In alle aspecten van ons werk, handelen we met respect voor mens en milieu.

**EN |** *In all aspects of our work, we act with respect for people and the environment.*

**DE |** *In allen Aspekten unserer Arbeit handeln wir mit Respekt für Mensch und Umwelt.*

**Groen Label Kas** - Gecertificeerd duurzame kas

# Onderscheidend met eigen planten

Kenmerkend voor AllPlant is, dat ons assortiment telkens vernieuwend is. Hiervoor werken we wereldwijd samen met veredelaars. Om onze klanten nog meer keuze te bieden hebben we zelf ook een aantal onderscheidende rassen ontwikkeld.

Glenn Spil werkt sinds 2020 als veredelaar vaste planten bij InnoFlora, het bedrijf dat veredelt voor AllPlant. ‘Plantenveredeling richt zich op het ontwikkelen van planten die zo goed mogelijk aan de eisen van de consument voldoen. We willen ons kunnen onderscheiden in de markt met andere mooie en goede producten, naast het assortiment van de vele internationale veredelaars waarmee we op een plezierige manier samenwerken.’

## Diverse variëteiten

De afgelopen drie jaar heeft Glenn met zijn team gewerkt aan de ontwikkeling van diverse variëteiten van gewassen die niet concurreren met de bestaande partners. ‘Daar zijn tot nu toe drie producten uit voortgekomen. Een herfstanemoon, die al vroeg en daardoor lang bloeit. We hebben een korte serie voor op de pot en een lange voor in de tuin. De bloemen zijn prachtig roodpaars. Bij onze eigen Heuchera en Echinacea series selecteren we op snelgroeende kwaliteiten en uniformiteit. Vooralsnog is onze Echinacea serie uniek in het aantal rijen dubbele bloembladen. Deze planten zijn sterk en verkrijgbaar in veel verschillende kleuren. Ze zorgen voor levendigheid in de tuin en plezier gedurende het hele jaar, ook in de winter als de vogels de zaden eten.’

## Focus op tuinprestaties

Voor de productontwikkeling heeft AllPlant een eigen tak opgezet, InnoFlora genaamd. De volgende stap is nog sterker rassen genereren, vertelt Glenn. ‘We willen onze focus leggen op tuinprestaties. Daarom gaan we onder andere grote proeven op het buitenveld opzetten en gedurende meerdere jaren monitoren hoe onze planten door de winter komen. Ook in de kas zet ik samen met mijn team proeven uit om data te genereren.’

## Natuurmens

In zijn eigen tuin experimenteert Glenn ook met planten uit de catalogus. ‘Omdat ik ze daar elke dag zie, leer ik wat wel en niet werkt. Het fijne van mijn werk is de vrijheid en de mooie afwisseling tussen binnen en buiten zijn, en praktisch en theoretisch bezig zijn. Al van kinds af houd ik van de natuur en daarom was het logisch om te kiezen voor dit vakgebied. Ik ben nog elke dag heel blij met die keuze.’

## EN | Distinctive with our own plants

Typical for AllPlant is, our always innovative assortment. To achieve this, we work with breeders worldwide. To offer our customers even more choice, we have also developed a number of distinctive varieties.

Since 2020, Glenn Spil has been as plant breeder at InnoFlora, the company that breeds for AllPlant. 'Breeding focusses on developing plants, which meet the requirements of the consumers. We would like to differentiate ourselves in the market with different, beautiful, and good products, in addition to the assortment from many international breeders with whom we cooperate in a pleasant way.'

### Various varieties

Over the last three years, Glenn and his team have worked on the development from various varieties of crops that do not compete with existing partners. 'So far, three products have resulted from that. An Autumn Anemone, which flowers early and therefore has a long blooming time. We have a compact series for patio use and a taller series for in the garden. The flowers are beautiful red-purple. For our own Heuchera and Echinacea series we select on fast growing characteristics and uniformity. As of yet, our Echinacea series is unique because of the double layer of flower petioles. These plants are strong and available in many colours. They provide liveliness in the garden and enjoyment throughout the year, including in winter when the birds come to eat the seeds.'

### Focus on garden performance

AllPlant has set up its own business unit for product development, called InnoFlora. The next step is to generate even stronger varieties, Glenn says. 'We would like to put the focus on garden performances. That is why we are going to set up big trials at our outdoor field and monitor for multiple years how the plants are going through the winter. Together with my team, we also set up trials in our greenhouse to generate data.'

### Nature lover

In his own garden, Glenn also experiments with plants from the catalog. 'Because I see them every day, I learn what does and doesn't work. The great thing about my work is the freedom, the variation in working inside and outside and working practical and theoretical. Since I was a child, I love nature, so it was obvious to choose for this work field. I am still very happy with that choice every day.'

## DE | Kennzeichnend mit unseren eigenen Pflanzen

Charakteristisch für AllPlant ist, dass unser Sortiment stets innovativ ist. Um dies zu erreichen, arbeiten wir mit Züchtern auf der ganzen Welt zusammen. Um unseren Kunden noch mehr Auswahl zu bieten, haben wir selbst auch eine Reihe von besonderen Pflanzensorten entwickelt.

Glenn Spil arbeitet seit 2020 als Staudenzüchter bei InnoFlora, dem Unternehmen, das für AllPlant züchtet. In der Pflanzenzüchtung geht es darum, Pflanzen zu entwickeln, die den Bedürfnissen der Konsumenten bestmöglich entsprechen. Wir wollen uns auf dem Markt mit anderen schönen und guten Produkten profilieren, zusätzlich zu dem Angebot der vielen internationalen Züchter, mit denen wir gerne zusammenarbeiten.

### Verschiedene Sorten

In den vergangenen drei Jahren hat Glenn mit seinem Team mehrere Pflanzensorten entwickelt, die nicht mit bestehenden Partnern konkurrieren. „Daraus sind bisher drei Produkte hervorgegangen. Eine Herbstanemone, die früh und damit lange blüht. Wir haben eine kompakte Serie für den Container und eine höhere Serie für den Garten. Die Blüten sind wunderschön rot-violett. Bei unseren eigenen Heuchera- und Echinacea Serien suchen wir nach Schnellwüchsigkeit und Gleichmäßigkeit. Unsere Echinacea-Serie ist derzeit einzigartig in der Anzahl der Reihen gefüllter Blütenblätter. Diese Pflanzen sind kräftig und in vielen Farben erhältlich. Sie bringen Lebendigkeit in den Garten und bereiten das ganze Jahr über Freude, auch im Winter, wenn die Vögel kommen, um die Samen zu fressen.“

### Fokus auf Gartenleistung

Für die Produktentwicklung hat AllPlant einen eigenen Tochterbetrieb namens InnoFlora gegründet. „Der nächste Schritt besteht darin, noch stärkere Sorten zu entwickeln, sagt Glenn. Wir wollen unseren Schwerpunkt auf die Gartenleistung legen. Deshalb werden wir unter anderem große Versuche im Freiland anlegen und über mehrere Jahre beobachten, wie unsere Pflanzen den Winter überstehen. Gemeinsam mit meinem Team werde ich auch Versuche im Gewächshaus anlegen, um Daten zu sammeln.“

### Naturliebhaber

Auch in seinem eigenen Garten experimentiert Glenn mit Pflanzen aus dem Katalog. „Weil ich sie dort jeden Tag sehe, lerne ich, was funktioniert und was nicht. Das Tolle an meiner Arbeit ist die Freiheit und die schöne Abwechslung zwischen drinnen und draußen, zwischen Praxis und Theorie. Ich liebe die Natur schon seit meiner Kindheit, daher war es auch logisch, dass ich mich für diesen Bereich entschieden habe. Ich bin auch heute noch jeden Tag sehr glücklich mit dieser Entscheidung“.
